## PROFESSIONAL

# MultiLac™

## Pre-Catalyzed Lacquer

MultiLac Pre-Catalyzed Lacquer is a single-component, pre-catalyzed lacquer that provides excellent chemical and wear resistance.

# MultiLac

## Pre-Catalyzed Lacquer

For use on wood surfaces, kitchen cabinets, office and household furniture, and fine architectural woodwork including trim, windows, and doors. For wood substrates only. For interior use only.

### FEATURES

- Superior performance to standard nitro-cellulose lacquers without having to add catalyst as is necessary with post-catalyzed lacquers or varnishes.
- Self-sealing technology
- HAPs compliant
- Meets KCMA and ASTM performance requirements when applied according to manufacturer's specifications

### PHYSICAL PROPERTIES

|                       |                          |          |
|-----------------------|--------------------------|----------|
| Solids Volume:        | 23%                      |          |
| Solids Weight:        | 32%                      |          |
| Theoretical Coverage: | 374 sq. ft./gal          |          |
| Viscosity at 77°F:    | 20 to 25 seconds #2 Zahn |          |
| Weight:               | 7.81 lb/gal              |          |
| Flash Point:          | 1°F                      |          |
| Gloss at 60° :        | Gloss                    | 80+      |
|                       | Semi-Gloss               | 55 to 60 |
|                       | Satin                    | 30 to 35 |
|                       | Dull Satin               | 20 to 25 |
|                       | Flat                     | 4 to 9   |
